

Additional information No. 1

Name of the tenders:

TP25-012 2PP 3D Printer for Foam Targets

Organisation:	The Extreme Light Infrastructure ERIC
Registered office:	Za Radnicí 835, 252 41 Dolní Břežany, Czech Republic
Identification number:	109 74 938
Person authorized to act on behalf of the Organisation:	Allen Weeks, Director General

(Hereinafter referred to as the “**Organisation**”)

The Organisation received additional questions. The Questions („Q”) and Answer („A”) are below:

1. Q: PRICES AND INVOICING

REQ-501209/A

Q: The 2PP Printer shall support large-volume resin vats and automated or heated dispensing systems suitable for continuous or batch production.

With all current 2PP Printers on the market, continuous production is not possible, as the printing is done on a substrate-by-substrate basis which needs to be exchanged before the next print can be started.

We suggest changing the requirements to the following to suit all providers:

The 2PP Printer shall support large-volume resin vats or automated dispensing systems suitable for batch production on one substrate.

A: REQ-501209/A - the requirement does not imply that the production has to be done on multiple substrates. Furthermore, there is 'or' for the continuous or batch production. Therefore, the proposed change is acceptable as it is already included in the original wording..

2. Q: REQ-501218/A

The 2PP Printer shall be managed with user-friendly software supporting STL, OBJ and file imports.

Is the requirement to import all the file formats listed or is the standard format for 3D print files “STL” enough?

What exactly is meant by “file imports”?

EX: REQ-501218/A - Indeed, there is one word missing and to further clarify we wish to replace 'and' with 'or'. So, the Organization corrects the requirement in the following way:

"The 2PP Printer shall be managed with user-friendly software supporting STL, OBJ or other file imports."

The Organisation decider extend the deadline for submmision. Tenders must be submitted to the email address **tenders@eli-laser.eu**, by **June 26, 2025 at 10 AM** at the latest. Other provisions of the tender conditions remain valid.
